

Summer Consultants Selected for Electrical and Mechanical Open-Ended Contract by North Carolina State University

Summer Consultants, Inc. has been selected for a 2018-2019 Electrical and Mechanical Engineering Open-Ended Service Agreement Design (OESAD) contract by North Carolina State University. Under the OESAD contract, Summer Consultants will provide on call electrical and mechanical engineering design and consultation services to North Carolina State University's Facilities Division. Summer Consultants was one of four firms selected for the 2018-2019 electrical and mechanical engineering OESAD contract among 20 total firms competing for it.

Projects under the OESAD contract will be for small renovations with construction budgets less than \$500,000. Electrical and mechanical designs provided under the contract typically will be part of larger renovation projects or may be the project's primary focus. In addition to providing designs, firms selected for the OESAD contracts work with North Carolina State University's Department of Construction Management during the assigned project's construction phase to facilitate successful outcomes.

Summer Consultants is a small business (NAICS Code 541330) mechanical, electrical, plumbing and fire protection engineering consulting firm also providing commissioning and construction administration services. Summer Consultants is headquartered in McLean, Virginia and opened its office in Raleigh, North Carolina in 2014. In addition to these two locations, the Company has offices in Virginia Beach, Virginia; Newark, Delaware; and Philadelphia, Pennsylvania. Summer Consultants was one of 16 small business nationwide to receive the Small Business Achievement Award by the Department of Homeland Security in 2015.
